

# Welcome to St Andrew's Church, Medstead

**Inside there is a serious lack of space, and an accumulation of furniture that deprives flexibility in worship.**

**The Priest's stall and the lectern clutter the area and is full of trip hazards.**

**The pulpit has no historical value and deprives flexibility of space.**

**The choir stalls are uncomfortable and deprive flexibility in the Sanctuary.**

**The north side of the Sanctuary is almost unused.**

**The electric organ is currently raised, but with refurbishment it would be lowered to fit.**

**The front south-side pew has a stall that is unused and takes up space.**

**The base needs to be removed along with the front stall.**

**STEP ONE: Remove pulpit, priest's stall and lecturn.**

**STEP TWO: Extend Sanctuary step forward by 1m 40cms with wooden platform.**

**STEP THREE: Replace unsightly radiator by north Sanctuary step and put inside recess.**

**STEP FOUR: Replace south side radiator by altar rail and place opposite the north side radiator.**

**STEP FIVE: Remove choir stalls, fit panelling along north and south walls of Sanctuary and carpet throughout.**

**STEP SIX: Provide new lectern, priest's stall and choir chairs for new flexibility in the Sanctuary.**

**There could either be side boxes on the choir chairs for books, or a movable choir stall.**

**STEP SEVEN: Consider a removable nave altar (allowing space for weddings and funerals) but still using the altar rail at the High Altar.**

**At the back of the church, remove the raised platform ready for carpeting.**

**Integrate new matting into the new carpeting.**

Pews have already been temporarily removed ready for carpeting.

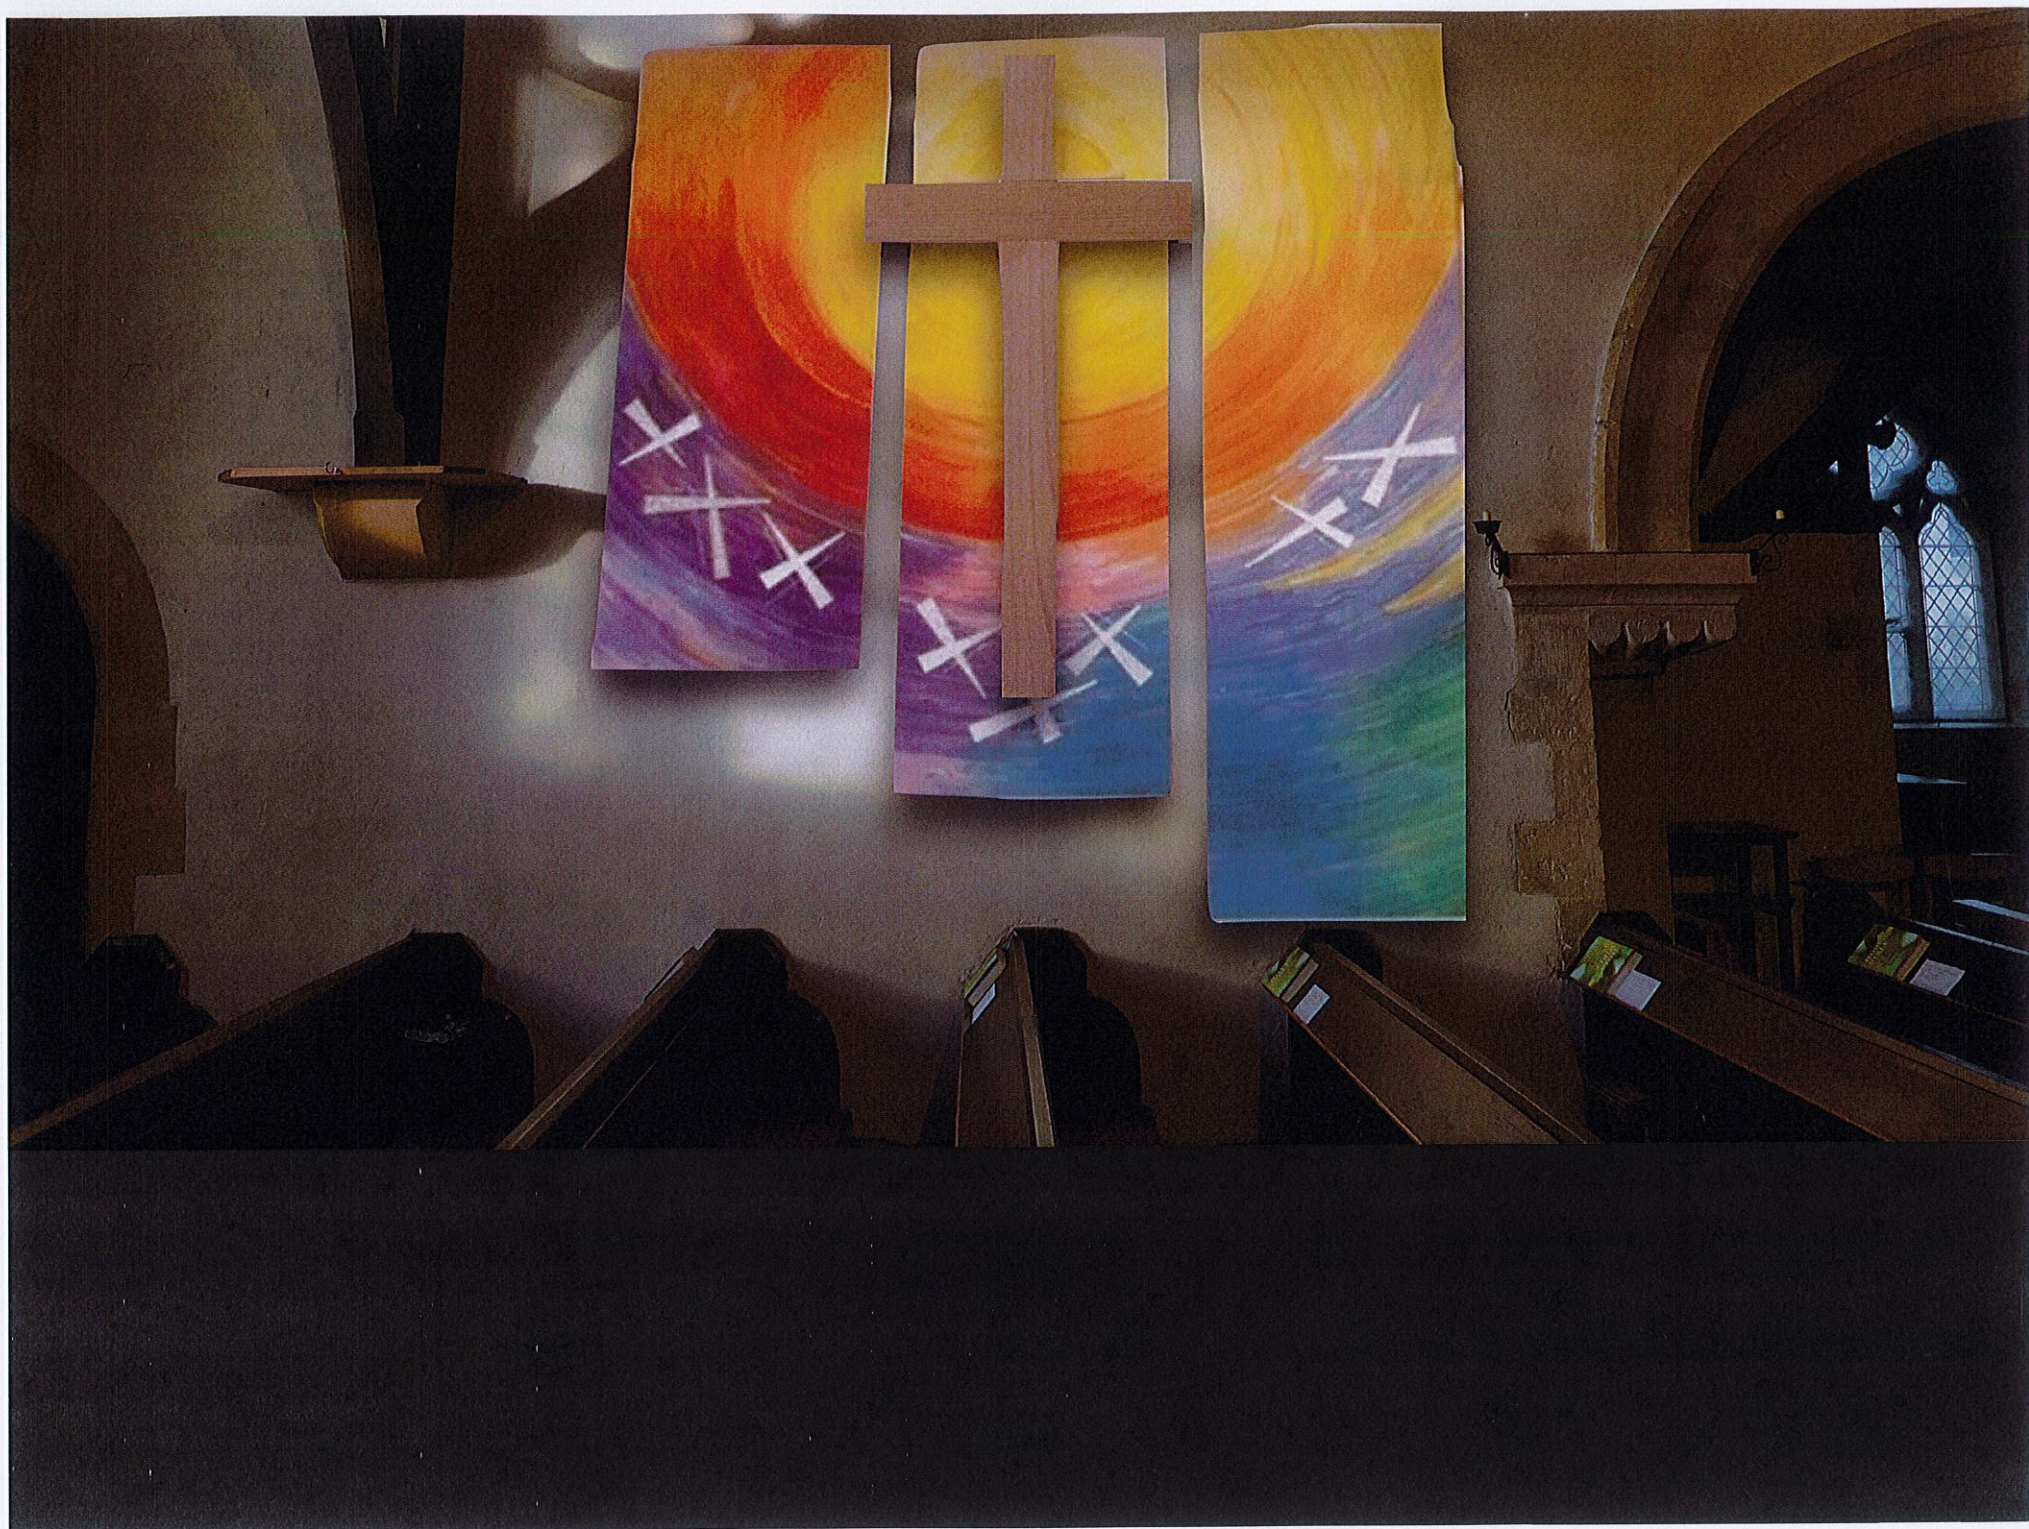

**Look to a brighter welcome**

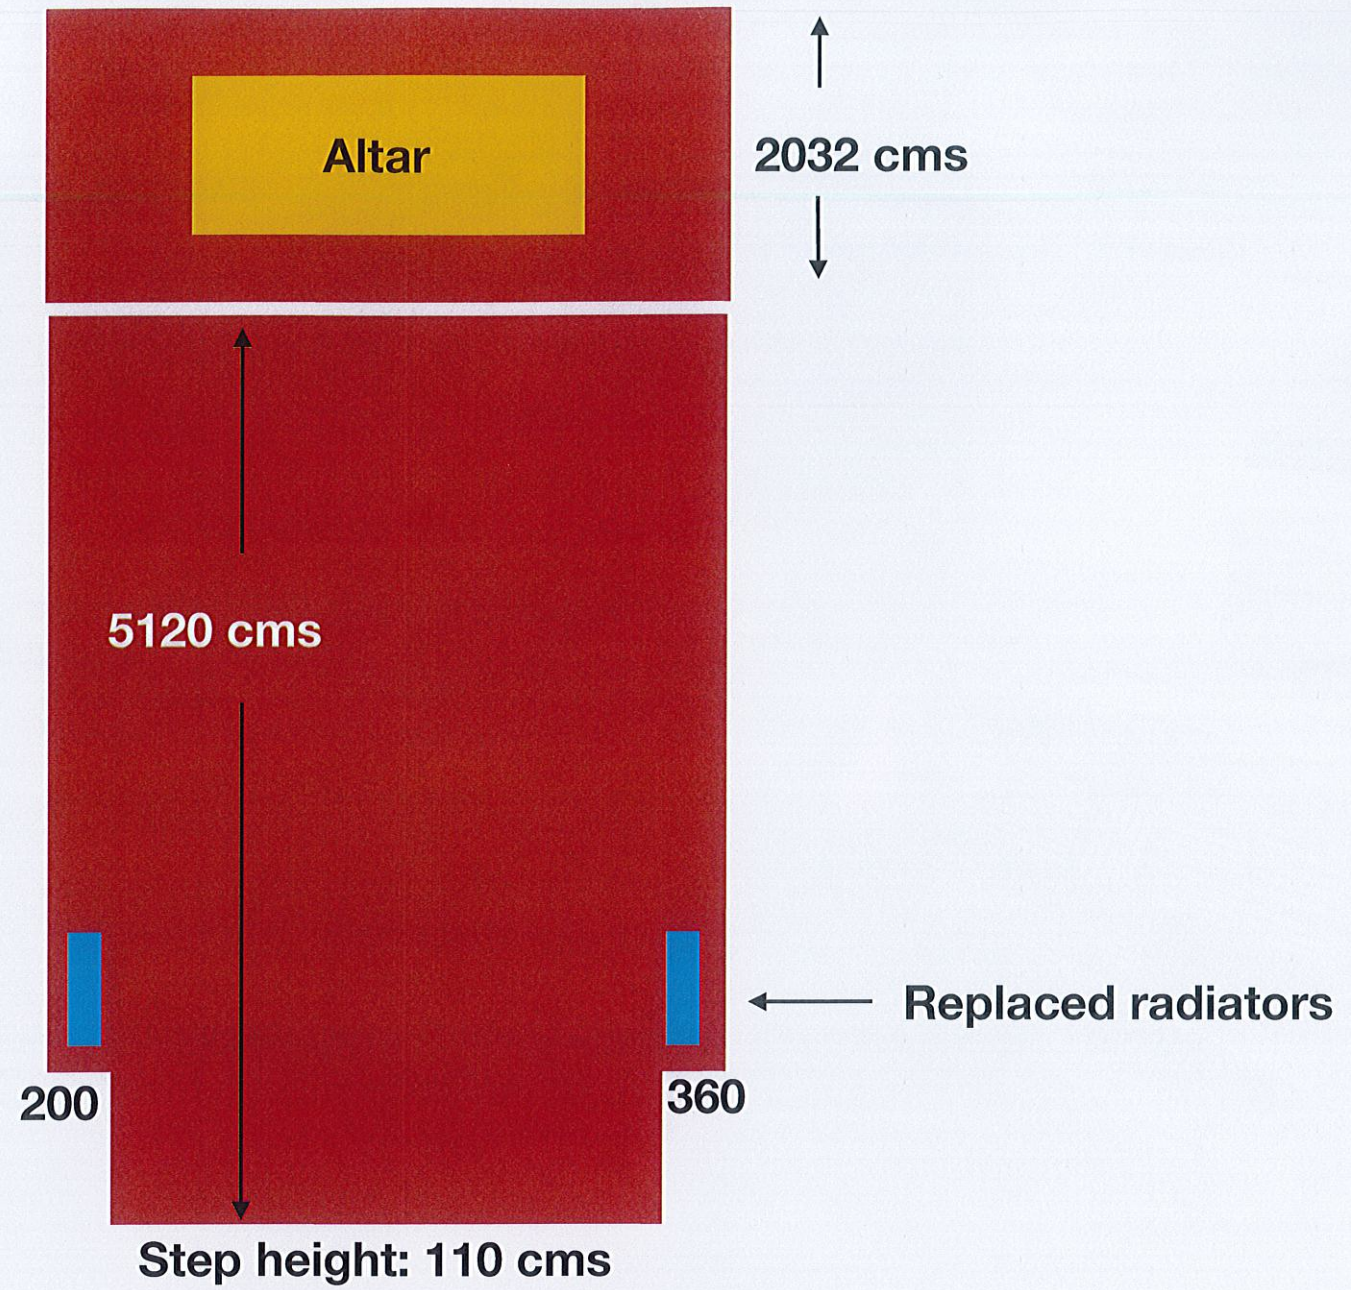

**Provide new stackable chairs for overflow in North Transept and back of the church.**
